

Table 1. Changes in intracellular levels of vascular endothelial growth factor (pg/10⁶ cells) in clone A or HCT-8 human tumour cells as a function of oxygen concentration

Cell line	Oxygen Concentration (%)						
	21	10	3	1	0.3	0.1	0.01
Clone A	73.0 (63.3–83.7)*	88.9 (75.7–104.4)	117.5 (103.4–133.5)	234.1 (199.2–275.0)	475.7 (425.7–531.5)	721.6 (598.8–869.6)	1241.5 (1013.8–1520.4)
HCT-8	1.5 (1.3–1.7)	3.9 (3.4–4.5)	27.6 (32.2–32.8)	106.0 (87.1–129.0)	330.8 (285.7–383.0)	624.3 (535.0–727.8)	1180.4 (1042.4–1336.7)

*Values in parentheses are the range of the se of the geometric mean from three separate experiments.
