^aReferences to data on numbers of germline cell divisions: human [Crow 2000]; *D. melanogaster* and mouse [57]; *C. elegans* [58]; and *A. thaliana* [59]. Numbers of cell divisions are unknown for the mouse and rat rates.

^bMammalian tissue-specific rates are given only for tissues in which at least two independent estimates have been acquired. All data on human mutation rates are taken from Lynch [36]. Data for somatic mutation rates in mouse and rat are derived from references contained within the supplementary material online. References to data on germline mutation rates are: *D. melanogaster* [5], *C. elegans* [4], *A. thaliana* [Ossowski et al., 2009], *S. cerevisiae* [3], and *E. coli* [24].
