

Table II: Association Rate Constants for Antibody Binding to a Cytochrome *c*-Antibody Complex^a

reaction	association rate constant, k_1 ($M^{-1} s^{-1}$)
2B5 antibody + cytochrome <i>c</i>	$(4.0 \pm 0.3) \times 10^5$
5F8 antibody + cytochrome <i>c</i>	$(6.1 \pm 1) \times 10^5$
2B5 antibody + 5F8 antibody-cytochrome <i>c</i> complex	$(3.3 \pm 0.5) \times 10^5$

^a The reactions were carried out at 3.8 °C by manual mixing.
