

Table S7. Average cell cycle periods for cells of different ploidy. The table shows the mean +/- standard error of the mean in minutes with the number of observations reported in parenthesis.

	Haploids	Diploids	Tetraploids
G1 daughter	37±2 (158)	25.7±0.8 (164)	30.5±0.8 (100)
Budded period daughter	76±2 (97)	81±1 (95)	82±2 (52)
G1 mother	15.6±0.5 (202)	14.1±0.4 (184)	16.2±0.4 (104)
Budded period mother	72±1 (116)	71±1 (105)	74±2 (54)
Total cycle daughter	112±3(97)	106±2 (95)	113±2 (52)
Total cycle mother	87±1 (116)	85±1 (105)	90±2 (54)
