

Table 4
Effect of the carbon source on the concentrations of metabolites

Carbon sources	NADPH	NADP	NADPH	NADH	NAD	NADH	Citrate	Oxoglu- tarate
			————— NADP			————— NAD		
Glucose	0.24	0.04	6.2	0.41	2.10	0.19	3.56	1.05
Acetate	0.47	0.03	14	0.89	1.94	0.46	16.30	0.35

Concentrations are expressed in $\mu\text{mol/g}$ dry wt. The values are the means of 3 expt
