

TABLE 2**GSH intracellular concentration in different conditions and genetic backgrounds**

S.D. among 13 (WT in standard conditions) or 4 (other conditions/strains) independent experiments is indicated between parentheses.

Strain	Condition	Intracellular concentration
		<i>mM</i>
WT	Standard	3.0 (0.5)
WT	Sulfur starvation (1 h)	0.1 (1.10^{-3})
WT	Nitrogen starvation (2 h)	4.2 (0.5)
WT	Nitrogen starvation (6 h)	4.8 (0.1)
<i>dug2</i> Δ	Standard	6.2 (0.6)
<i>dug3</i> Δ	Standard	6.6 (0.2)
<i>ecm38</i> Δ	Standard	2.5 (0.2)
