

TABLE 1

Relative amounts of fat, muscle, skin, skeleton, etc., in the bodies of undernourished and rehabilitating pigs and their wellnourished controls

The fat-free body weights are given in kg., the other data as g./100 g. of the fat-free body weight. The figures in brackets indicate the number of animals analysed to obtain each figure

	Undernourished		Rehabilitating		
	Under-nourished (3)	Control (2)	Stage I (1)	Stage II (2)	Control (2)
Fat	0.2	12.6	2.0	6.7	18.9
Fat-free body weight	4.93	4.42	6.65	9.08	7.58
Muscle	34.0	42.9	35.1	37.8	43.0
Skin	25.0	16.9	22.6	17.3	14.0
Skeleton	18.9	14.6	16.9	16.5	14.4
