

Table 1. Relative brain size in selected mammals

Species	Relative brain size (EQ)	Neurons in brain
Mouse	0.5	10^7
Monkey	2.09	10^9
Human	7.44	10^{11}

Relative brain size is given in terms of encephalization quotient (EQ) (Jerison, 1973); data are taken from Macphail (Macphail, 1982). The estimates of neuron number in the brain are taken from Braitenberg (Braitenberg, 2001).
