

Figure 3. The Thymic Universe. Areas of circles and widths of arrows are proportional to the cellularity and lifespan of the indicated populations, respectively. TSP, thymus-seeding progenitor; LSK, $\text{Lin}^- \text{Sca-1}^+ \text{Kit}^+$; HSC, hematopoietic stem cell; MPP, multipotent progenitor; CLP, common lymphoid progenitor; CTP, circulating T lineage-committed progenitor; DN, double negative; ETP, early T lineage progenitor; DP, double positive; SP, single positive.
